2.3	AS	Share feedback about 7.5 kVa with Network team and respond back to committee	Sep 2024	New
2.4	JP	Can we share a list of contacts for harmonization working group across the industry. Does AJ have a list?	Sep 2024	New

Minutes from Q2 2024 meeting

Agenda item	Consensus/summary
2	SN: question re tie ins. Seems there have been delays, perhaps due to earthing assessments. Delays are impacting developers. Can we take a more case by case basis? Awaiting culture heritage induction, can Powercor fall in under existing agreements? Might we be open to a partial energisation? SR: Will engage further. Next 6 months will likley be a challenge but backlog exists. Those that fail first assessment present the greatest challenge. We are also getting through the network data requests, with a dedicated resource onboard shortly
2	JF: Question regarding tie in. 20 days and agreed are they different? SR: Yes. These are different measures. SN: notes medium density scenarios present greater urgency for tie in because house builds are in progress.
2	SN: notes final autit times are great. Design reviews have become a challenge where more projects are being reviewed by ROs. Getting questions about things that have already been approved. Non-perpindicular kiosks requiring approvals? JM: reference to directions from property team regarding size/shape of land resulting in ongoing costs. PG: noted various factors that can necessitate extended review/assessment
2	MP: Recieving Powercor comments that don't relate to safety or standards. Upon resubmission plan goes back to regular timeframes PG: We recheck entire plan upon resubmission because we don't know what changes have been made. Have been caught out before when things have changed unknowingly. Contractor rating program will may allow quicker turnaround for highly rated participants
2	SN: re: new kVa per lot? 40 lots per kiosk? Any flexibility on that, requires a lot of land set aside for kiosks? AS: 7.5kVa per lot currently. Not yet locked in. Feedback to be shared with Network team
2	AG: Does CP/PAL have a list of contacts from CP/PAL/UE for harmonisation working group. SN: other topics for harmonisation eg. earthing standards & cultural heritage JF: notes project volumes trending down
6	**Next report via circular in November 2024 (Q3 2024)** **Next meeting to be scheduled for ~February 2024**
